One Bright Star

Paul Weller

I only want you, I only want you You're the one bright star in my eyes I only need you, I only need you You're the one bright star, shine for me

Without you I feel nothing My one bright star shine for me

I only love you, I only love you You're the one bright star in my life I only need you, I only need you You're the one bright star, shine for me

Without you I feel nothing My one bright star shine for me
