

# One X One

Paul Weller

Share your dreams  
Give us all the beam we need  
Like electric lights in a ballroom scene  
Going on one times one

Shed your chains  
To earth like dew and all remain  
Forever in another vein  
As you slip into another stream

Oh, give your love  
Give us everything you've got  
The world's a better place for that  
When you have love to give

Don't fear not  
Not where you're tread  
It's only

Head that sign  
For all of us who wait in line  
Waiting for the words to rhyme  
Bringing on a brand new day

Oh, give your love  
Give us everything you've got  
The world's a better place for that  
When you have love to give

Don't fear not  
Not where you're tread  
It's only

Don't fear not  
Not where you're tread

So dance little sister, dance  
Like you've never danced before  
It's just a moment we're going through  
This is the new dance that we do

So sing little brother, sing  
And turn on everyone  
Lift their spirits high  
To a place we need to find

Share your dreams  
Give us all the beam we need  
Like electric lights in a ballroom scene  
Going on one times one

Shed your chains  
To earth like dew and all remain  
Forever in another vein  
Going on one times one

One times one

Going on one times one  
Yeah, one times one  
Going on one times one  
Yeah, one times one  
Going on one times one
