

As Far as I Know

Paul Westerberg

I'm in love with someone that doesn't exist
Keep looking for them everywhere I go
I'm in love with something that doesn't get kissed
It doesn't exist
As far as I know

I'm in love with a face that I've never seen
Once upon a place long time ago
I'm in love with a time that never took place
That's easy to trace
As far as I know
And I know everything that I need to sing
I know everything

I'm in love with the sound that I never hear
As long as I watch your TV show
I'm in love with that girl that doesn't resist
That doesn't exist
As far as I know

As far as I know, the stars in the sky are dull
As far as I know, compared to your eyes only
As far as I know

I know everything I need to sing
I know everything
I raise a gun, that won't hurt me none
I'm in love with a dream I had as a kid
I wait up the street until you show
That dream it came true, but you never do
No you never did
As far as I know
