

Standing Here With You (Megan's Song)

Pavlov's Dog

Well I lost all I was
And it's more than I've tried to be
This living here with you
And there's no one here besides me
And it don't come easy
And it don't come too hard
But I always wind up
Always standing here with you

Things just stay the same
People just don't grow so fast
And where once I was a child
I've found I just can't stay like that

You say it doesn't matter
If things just stay the same
You say it doesn't matter
And then maybe stay the same
Or when
It really doesn't matter
If I really was to blame
Really was to blame
And sad that it shows
