

Standing Here With You

Pavlov's Dog

Well I lost all I was
And it's more than I tried to be
And this living here with you
And there's no one here beside me

And it don't come easy
And it don't come too hard
But I always wind up
Standing here with you

Always standing here with you
Always standing here with you
I'm always standing here with you
As you walk on side by side
And it shows

And when things just stay the same
And when people just don't grow so fast to know where
Where once I was a child
But I found I just can't stay like that

You say it doesn't matter
If things just stay the same
You say it doesn't matter
And then we'll maybe stay the same
Oh when it really doesn't matter
If I really was to blame, no
Really were to blame
And sad that it shows

Well I lost all I was
And it's more than I tried to be
And this living here with you
And there was no one here beside me

And it don't come easy
And it, it don't come too hard
But I always wind up
Standing here with you

Always standing here with you
Always standing here with you
And always standing here with you
And you walk on side by side
And it shows
Oh, and it shows
