

# Only at Night

Peabo Bryson

There's nothing like  
The thrill of the night in the USA  
There's a million and two  
Things you can do  
Chase the blues away  
On the town by yourself  
Or with someone else having fun  
This is the time  
I tried to unwind, one-on-one

Hot city nights on Broadway  
Dancing all night 'til the break of day  
So many lovers waiting to be discovered  
Like you and I, and they come alive  
In the night, only at night  
They come alive in the night

Out with the crowd  
Where the music is loud  
And the lights are low  
Under the stars  
In convertible cars  
They cruise for sure  
Running into the night  
A fool's paradise  
They come and go  
Searching for love  
That's what dreams are made of  
From coast to coast

Hollywood nights in L.A.  
Cruising all night 'til the break of day  
So many lovers waiting to be discovered  
Like you and I, they come alive in the night

I've been working all day  
Now it's time for fun  
Been working hard all day  
I can hardly wait for the night to come  
(I can hardly wait)  
That's the time we live a fantasy  
Escape reality and come alive  
In the night, only at night  
I come alive

People in the north, east, south and west  
They tell me that the night is the best  
Oh, I like the day and there's a lot to like  
But the things I love, I like to do at night  
(In the night)  
There are daytime people and I think that's fine  
But I believe the night is another's kind  
(In the night)  
When you work all day just to survive  
You wait for the night to come alive  
There's only one thing that's left to say  
When you're lovin' at night that you can't in the day

Now rock!  
(Only at night)

And they come alive  
In the night, only at night  
Night is when you come, baby  
In the night, only at night  
Do it in the night  
I come alive, in the night

Nighttime is the right time, baby  
In the night, only at night  
Do it in the night, do it in the right  
They come alive in the night  
In the night, only, only at night  
They come alive in the night...
