

Beyond The Horizon

People In Planes

Beyond the horizon
People are arriving
You're welcome to stop and stare
'Cause nobody will ever care
They'll never care

Beyond your horizon
There are no delusions
There are no musts or compulsories
It's everything it wants to be

No, you're not gonna make it
What planet are you on?
No, I just don't buy it
No one will ever care
No, you're not gonna make it
What planet are you on?
No, I just don't buy it
They'll never care

Think of all the bad things
That could happen
All those life threatening situations
This is my utopia for you
We've got everything mapped out for you
Think of all the bad things
That could happen
All those life threatening situations
We've got everything mapped out for you
This is my utopia for you
They'll never care
