

Old Time Problem

Pepper

Well, I see the sunshine in your hair
But I'm tied up with inebriation
Naughty girl, leave me alone

It's a moonshine love
I'm so jealous that I cut my hand off
Broken glass is in my veins

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

Now that I'm a tipping toes
I'm looking outside through the bullet holes
No one will ever know, how hard it is to answer the phone

All my words get twisted, all my faith gets lifted
All my pain is drifting, and I don't know why

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

Well, I get so tired of trying
When I know you'll never be pleased
You're always giving me something
But never anything I need

Or maybe this ain't working
My back's against the wall
Maybe it ain't working
But that's the way it goes

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

You're like an old time, old time problem
And when I should have left you alone
Well, now you got me on the floor

You're like an old time, old time problem hey
And when I should have left you alone
Well, now you got me on the floor
