

# Fight the Plague

## Pestilence

Epidemic winds blow inaudible through time  
Filled with the removable form of death  
Inevitability through its invisible bacterial crime  
Death of an innocent on his death-bed

Inevitable death you cannot see  
Fight the plague, it's running free  
Innumerable loss of life through extirpation  
Unicellular destroyer of the population

A futile war against the indestructible  
No case of remedy or immunity  
Weakening of health of the susceptible  
The clinical picture of morbidity  
Lethal dangerous virus circulates the sky  
Creator of unbearable pain and epidemic  
Lonely and not perceptibly it'll fly  
Thousands of people incurably sick

Inevitable death you cannot see  
Fight the plague, it's running free  
Innumerable loss of life through extirpation  
Unicellular destroyer of the population

Fight the plague  
Fight the plague  
Fight the plague  
Fight the plague

Death-rate is getting larger, never gonna end  
Unless the day will come, we're able to defend  
A premature dead, they cry a awful sound  
Deadly infection, the antidote has to be found

Precautionary measures won't help you to survive  
The chance you got infected is big and unstoppable  
Anxiety makes you can't lead a normal life  
Devastate the epidemical disaster can't be impossible

Inevitable death you can not see  
Fight the plague, it's running free  
Innumerable loss of life through extirpation  
Unicellular destroyer of the population

Fight the plague  
Fight the plague
