

# Sister Disco

Pete Townshend

As I walked out that hospital door  
I was sewn up like a coat  
I got a smile from the bite of the wind  
I watched the fresh fall of snow

I knew by then that my life took a turn  
I felt strong and secure  
With adhesive tape over my nose  
I felt almost demure

Goodbye sister disco  
With your flashing trash lamps  
Goodbye sister disco  
To your thugs and your tramps

Goodbye sister disco  
Now I go where the music fits my soul  
Where the music fits my soul  
And I will never let go  
Till the echo of the street fight has dissolved

I will chase nightmares and cold stormy seas  
I will take over your grief and disease  
I'll stay beside you and comfort your soul  
When you are lonely and broken and old

Now I walk with a man in my face  
A woman in my hair  
I've got you all looking out through my eyes  
My dancing feet are a prayer

Goodbye sister disco  
With your flashing trash lamps  
Goodbye sister disco  
To your thugs and your tramps  
Goodbye sister disco  
My dancing's left you behind  
Goodbye, now you're solo  
Black plastic deaf dumb and blind

Goodbye  
Goodbye sister disco

Ha ha ha...

Goodbye sister disco  
Goodbye sister disco I got to go  
Goodbye sister disco  
Goodbye sister disco with your flashing, your flashing  
Trash lamps  
Get out of here
