

Show Me

Peter Criss

Planes, trains and limousines
So what, what does it mean
We're burning down like mercury
God save the Killer Queen

And I know what's up in this life
It ain't a mystery, it's a fantasy
It's a long, long ride and it hurts like hell

One track minds takin' the best of me
I've got an itchy trigger finger that will set me free

Tell me where you're going
I know there's something better
Show me where you've been
I've got to know
Tell me what you're knowing
I know there's something better
Show me where you've been
I've got to know

Caffeine and nicotine
C. Everette Coop's looking out for me
But you can buy a gun to kill a Kennedy
From a magazine
Mother Mary what's the use
When I ain't got nothing left to lose
Salvation always goes to my head
One track minds takin' the best of me
I got my finger on the button of insanity
I'm tired of hearing 'bout what could be
Just take me down, take me down, take me down

Tell me where you're going
I know there's something better
Show me where you've been
I've got to know
Tell me what you're knowing
I know there's something better
Show me where you've been
I've got to know

Tell me where you're going
I know there's something better
Show me where you've been
I've got to know
Tell me what you're knowing
I know there's something better
Show me where you've been
I've got to know
