Hot Lovin'

Your face is magic Your words are so cold You felt so lonely I tried to let go What will it be whose gonna win Can't you see the trouble were in

Hot lovin' next to the stage Hot lovin' oh yeah we can make

You're dressed so lovely Your hair is a mess You see the stars Some bigger some less You think it's magic The lights and the sounds It is real you know what we found

You try to keep me going I couldn't stop the growing You know it's hard to handle You don't know where to run to **Picture**
