

I've been delivered, I've seen the light
We'll fix your needs each day and night
I see you standing, now wait in line
Come turn my water into wine

He'll shed a light and what a host
His shadow is your holy ghost

Drugzilla
Don't make me wait
Drugzilla
While you masturbate
Drugzilla
It's too little too late
You've got your eyes half open
And your ass on the plate

Five knuckle shuffle shift to fit
That little baby she's mine to flip

He'll nail a halo upon your head
Your predilections need
Your crucifixion's dead
I've been rejected, I've been believed
This chemical violation leaves me
So deep in need

Drugzilla
Don't make me wait
Drugzilla
While you masturbate
Drugzilla
It's too little too late
You've got your eyes half open
And your ass on the plate

I suck it up, all the things that you need
I take it in, I leave you broken bruised and deceived
I suck it up, all the things that you need
I take it in, I leave you broken bruised and deceived

Drugzilla
Don't make me wait
Drugzilla
While you masturbate
Drugzilla
It's too little too late
You've got your eyes half open
And your ass on the plate

Five-knuckle shuffle shift to fit
Little Drugzilla ripe to hit
