

# Light Before the Dark

Place Vendome

Even when awake I'm dreaming, living fantasy

Is it what it takes believing  
In things that you can't see  
Listen to the voices screaming  
Names of those beyond  
To the silent whispers healing  
Those of which we're fond

The cool wind is howling  
The emptiness inside me signs in harmony  
Our future is drowning  
We're in a state of urgency

Show them paradise 'cause hearts are bleeding  
Don't let them stop believing in  
Light before the dark, the ending and the start

Show them paradise 'cause hope is leaving  
Can't fail, if love is leading us  
Back to the start, to the light before the dark

Find it in your heart to give  
And take just what you need  
Maybe we can learn to live  
Selfless without greed  
Even when awake I'm dreaming  
Of a better world  
We got what it takes believe it  
To turn steel into gold

The cool wind is howling  
The emptiness inside me signs in harmony  
Our future is drowning  
We're in a state of urgency

Show them paradise 'cause hearts are bleeding  
Don't let them stop believing in  
Light before the dark, the ending and the start
