

I Can Do This

Plumb

I've been waiting for this moment, now it's here
I feel nervous and overwhelmed by my fears
Oh god, I'm so afraid, I need you now so take my hand
I'm trying to be brave and be the girl you say I am

I will cross the ocean into the unknown
I will face the darkness, I am not alone
I will fight against the voice that says to quit
And shout it from my lips that I can do this
I can do this

Waves are crashing all around me but I'm not scared
Cause I feel stronger than I've ever been
Cause storm may never change and I will always need your help
I just say a name again, again

I will cross the ocean into the unknown
I will face the darkness, I am not alone
I will fight against the voice that says to quit
And shout it from my lips that I can do this
I can do this

No matter what I face
I know I'll be okay
Cause you will give me strength
No matter what I face
I know I'll be okay
Cause you will give me strength

I will cross the ocean into the unknown
I will face the darkness, I am not alone
I will fight against the voice that says to quit
And shout it from my lips that I can do this
I can do this
Oh I can do this
I can do this
I can do this
