

## New Fast

## Poison the Well

Drove and drove like I was supposed to  
Drove and drove till the tires  
Lifted off the ground  
Fields in the distance purple lovely  
They cheer because we got what we wanted

Remember who was around  
Knowing you're all trudging around somewhere  
Answer my question  
Who was around!

They asked for quiet solitude, I didn't  
Finally felt like I did something to the end  
The ground hailed me with a fucking grin  
We fell and fell  
Never thought I would see that side of friends
