

# Shut Up, Make Love

Poison

Shipped out on of knees  
Her old man thinks you're a social disease  
Dog pissed on the floor left a stain  
Your old lady's daddy driving you insane  
She stopped taking the pill  
Then left you sued you for a mil  
You've got your problems, boy so damn great

Can't find a good wife can't find a good job  
Can't find the keys to my car  
I lost my dog I lost my brain  
I lost my girl to a big movie star (whatever)

Now I'm standing at the crossroads trying to find my way home  
But the truth is baby I'm so  
Lonely, lonely, lonely, lonely  
Sometimes I'd just

Like to jump in and get me some funky  
When push comes to shove  
You talk too much and way too rough  
How 'bout we both shut up and let's make love

I'm home hangin', the walls bangin'  
It's the neighbor next door  
They're talking trashy or doing the nasty  
They keep me up until four

So they keep on going more and more  
I hear and said "lord, I'm half crazy"  
I gotta get me some of that  
In and out, and in and out, and in and out

Like to jump in and get me some funky  
When push comes to shove  
You talk too much and way too rough  
How 'bout we both shut up and let's make love

When the clothes start flying  
There's no denying  
Gonna get some funky  
Good, good funky

Your blood starts pumpin'  
Baby start somethin'  
Here oh right here, right here baby  
Oh give me a little bit of loving

It's all so simple  
I'll bring the ripple  
What's your state of mind?

How 'bout we drink, get drunk

Like to jump in and get me some funky  
When push comes to shove

You talk too much and way too rough  
How 'bout we both shut up and let's make love

When push comes to shove  
Skip your lip and all the politics  
How 'bout we both shut up and let's make love

It would sound like this....  
Stop!
