

# Ex Machina

Pop Evil

We can't trust one another  
Evolve, survive  
A new world order  
Social decline

It's everything you hate to see  
It's everything you hate to be  
Eliminate the line  
The line between man and machine

Are we born to die this way  
Are we shallow minded slaves  
When machines feed our pain  
Pray the world will break  
Before we sacrifice  
The human race  
The human race

We're everything we never hope to be  
We're everything we never hope to see  
Yeah!

We can't think that it's over  
Don't fall in line  
Trust one another  
Rewire our lives  
Be everything we're meant to be  
See everything we're meant to see  
Take all the line between  
The line between  
Man and machine

Are we born to die this way  
Are we shallow minded slaves  
When machines feed our pain  
We pray the world will break  
Before we sacrifice  
The human race  
The human race

Are we shallow minded slaves  
Are we born to die this way  
With machines that feed our pain

Are we born to die this way  
Are we shallow minded slaves  
When machines feed our pain  
Pray the world will break  
Before we sacrifice  
We pray the world will break  
Before we sacrifice  
The human race  
The human race
