

# Wishing On The Same Moon

Powderfinger

I never really thought to say  
That whenever you set free  
You're devil smile on me  
I melt  
It's been a long time between  
When you first let me in  
Got underneath my skin

It's an echoing empty room  
Untill your love pours in  
And fills it to the brim  
I never felt the hook go in  
Untill you came around  
And broke me right back down.

There's just thing that i failed to tell you  
I'm wishing on the same moon and stars above you  
We're wishing on the same moon

Hear me now I'm calling out for you  
Pleading for your love  
You're falling from my view and and there's nothing i can do

I'm waiting in the afternoon  
For the sun to sink  
And let the night back in  
It's when i feel close to you  
When the stars they swoon  
And bring their night time bloom

There's just one thing that i failed to tell you  
I'm wishing on the same moon and stars above you  
We're wishing on the same moon
