

# Galaxies Unknown

## Power Quest

We all travel light and space  
To find the answer to the question  
Save the human race.  
Far out to galaxies unknown  
We'll never give searching  
Always thinking of our home.

The sands of our existence running low  
There's only one direction for us all to go.

Into the sky, high above where the eagle flies  
We journey to find a new home  
Beyond the stars where a new life will wait for us  
Somewhere we all can belong.  
Our world is dying as we speak  
From policy and government  
The future's looking bleak.  
We all must stand up for what's right  
The poor are getting poorer  
And the planet won't survive.

Tired of the fighting destroying our world  
Now is the time to be strong  
No turning back, we are leaving today  
Hoping to find our own way.  
We cried an ocean full of tears  
For those we left behind us  
When we made the journey here  
I hope that somehow they survive  
The odds are stacked against them  
In their Quest to stay alive.
