

F-I-R-E

Press Play

(Yeah, let's get the fire started)

There's somethin in the atmosphere
It's givin us somethin different here
I think it's time that we ignite
Bring the blaze into the night

Raise your torch a little higher
Screamin out a little louder
In all we see and all we do
The choice is up to me and you

Can you feel it in your soul?
Everyone stop drop and role
Givin up all our control
Oh oh oh oh oh
Can you feel it in your heart
Somethin is about to start
Can you see the sparks?
Oh oh oh oh oh
Let's start an F-I-R-E

(Let's go)
Somethin burnin to the bone
Right out into the danger zone
Running into the unknown
Reaching those that feel alone

Burnin like I'm flammable
Call my soul an animal
I can't help but let this...
beat move me like I'm outta control
Get a little bit of funk with a whole lotta heat
burn up the track with a little bit of me
I spit fire you just breathe
I desire you just lead
If the roof's on fire
better believe I ain't gonna pray for rain
I'm gonna yell let it go with the flames
Better yet let me get the propane
I want fire you light candles
You bring somethin we can't handle
Spirit light my heart
And bring your love
And bring this world to shambles
