

First Time Around The Sun

Pride of Lions

There's a warmth around my heart tonight
The stone's been lifted from my soul
A healing ember ever burning bright
A look, a touch and now I'm whole

All I imagined, now I feel
In three dimensions, now so real

I'm new here to this planet, give me all I took for
granted
I'm not wasting love, first time around the sun
If you're the angel they sent me, to accompany me
through destiny
This is our "day one", first time around the sun

There's a softness in your touch tonight
That starts a ripple 'cross my heart
Did we love here in another life
Or did fate and pride keep us apart

Each revolution of this earth
Brings us closer to our rebirth

I'm new here to this planet, give me all I took for
granted
I'm not wasting love, first time around the sun
If you're the angel they sent me, to accompany me
through destiny
Show me how it's done

This is where I get it right
This is how we ride the light
This is where we learn from lives gone by

This is the clay we're shaping
This is the day we're making
Don't let the moment pass you by

I'm new here to this planet, give me all I took for
granted
I'm not wasting love, first time around the sun
If you're the angel they sent me, to accompany me
through destiny
This is our "day one"

I'm new here to this planet, give me all I took for
granted
I'm not wasting love, first time around the sun
If you're the angel they sent me, to accompany me
through destiny
This is our "day one", first time around the sun
