

Love's Eternal Flame

Pride of Lions

Some nights, even the scent of you
Can send my senses reeling
Suddenly heart and soul
I'm lost inside a feeling
We are joined in one destiny
When we're apart, there's an arc bridging you and me,
eternally

Though only a photograph connects us now
I count on those memories to bring you back somehow
Our love is a reflection
Of the strenght of our hearts' connection
I can see the torchlight burning through the rain
It's love's eternal flame

Timeless, the hours I spend with you
Fly by in blind emotion
Rising and falling like a wave upon the ocean
Love is constant through time and tide
I'll be there, from here to the other side
I'm by your side

Though only a photograph connects us now
I count on those memories to bring you back somehow
Our love is a reflection
Of the strenght of our hearts' connection
I can see the torchlight burning through the rain
It's love's eternal flame

And now, when the winds are against me
I hear your voice whisper, baby
Everything's gonna be alright
I know, miles cannot separate us
We are joined in the fate that keeps us holding on
The torch of faith that keeps us strong
The best is yet to come

Though only a photograph connects us now
I count on those memories to bring you back somehow
Our love is a reflection
Of the strenght of our hearts' connection
I can see the torchlight burning through the rain
It's love's eternal flame
