

## Equilibrium

### Project Pitchfork

Why are you crying my dear.  
Do you think you're being treated unfairly again.  
Well why do you think this happened to you.  
Don't you think there's a reason for it.  
Every effect has its cause and every action returns to its origin  
in  
a pendulum that is pushed.  
Always swings back so why are you crying my dear.  
Treated unfairly again have you never treated.  
Someone like that before to injure someone means to injure your  
self.  
To inflict pain upon some means to inflict pain upon yourself.  
Everything has its two poles
