

Stacked Visions

Project Pitchfork

We're here - we stay
Stop killing them - go away
Shut your lie-hole and look around
Your life is and was a hell sound

Go deeper, deeper and see
Look deeper, deeper and be
Come closer, closer to the sea
Feel what it is like to be

What is there - what's in here
Never simple - never inferior
It shines from the smallest parts
Which are the biggest stars

I'm here - I stay
You're killing them - go away
Shut your lie-hole and look around
Your life is and was a hell sound

We're here to stay
You're killing us - go away
Shut your lie-hole and look around
Your life will be forever a hell sound

Who told you
It would be different
The amount doesn't matter - not even here
Quality is the key - complexity the highest gear

All together it is one
Simplified for the eye of none
You push me to the edge
But all you can do - was already done

I'm here - I stay
You're killing them - go away
Shut your lie-hole and look around
Your life is and was a hell sound

We're here to stay
You're killing us - go away
Shut your lie-hole and look around
Your life will be forever a hell sound
