

# Wake Up You're Dead

Prozak

[Hook:]

It's no surprise now  
Look at my eyes now  
It's your demise now  
Wake up you're dead!  
It's on tonight bro  
Two rivals will collide with assault rifles  
Wake up you're dead!  
This is the end game  
No more pretending  
Quick to remove your membrane  
Wake up you're dead!  
This was the last straw  
And now it's last call  
Fuck it let the body's fall  
Wake up you're dead!

I can't explain it to you  
This hate that's in my blood  
It runs as cold as ice through my vain's and my thoughts just flood  
They take over my mentals with such a profile, lack of sentimental  
Blinded by rage I'm vengeful, revenge for the mentals  
Logic right out the window  
Maniac right from the get-go  
So tight I grip this pistol  
So no more innuendos  
So if we going to do it  
Lets get to doing this  
Spilling fluids  
Including each other in ancient sacrifice like druids  
Trust me you don't want to do it  
You don't want to get in to it  
I speak murder mighty fluent  
(Can't control myself man)  
If i put my mind to it  
I can stop your time from moving  
Leave your life in fucking ruins  
(Shaking's in my hands again)  
The voices in my head are getting louder  
And continue to tell me to bring a lamb to slaughter  
(Trust me you don't want that)  
Cause I might just snap and attack you  
Snatch you and have you an what have you  
Just to get it cracking  
(With this baseball bat)

[Hook]

We're some arch enemies  
Like some superhero building comics  
It seems our fate has brought us together homie we can't stop it  
Survival of the fittest, prepare to finally finish  
We're about to handle business  
One on one leaving no witness  
This hate submerges me  
The urgency to hurt you see  
Planning it perfectly

Disturbingly murder in the first degree  
No amnesty savagely stabbithy cavitys  
Causing a casualty casually  
By causing me chaos and calamity  
Every fiber in my being wants  
To cease your heart from beating  
Wants to stop your lungs from breathing  
(I think I've lost my mind)  
Don't let it be deceiving  
My calm demeanor meaning i really want to leave you bleeding  
(This rage has turned me blind)  
And my aggression has turned in to quite an obsession  
To teach you lessons with my weapons  
(This is a battle ground)  
I won't feel vindicated  
Til you are eliminated disintegrated on pavement  
(put you right in to the ground)

[Hook]

Seek and Destroy  
Invite betrayal Deploy  
Put him in holes  
Bodies explode  
Reload  
Like a carnival cannibal  
Red dragon like Hannibal  
This rage so animal  
Why can't I get a handle bro  
Lost in a state of psychosis  
I can barely focus  
Just go for the throat full force and choke  
And hope that it closes  
But just remember you provoked this  
And woke this ferocious beast  
So take notice its about to swarm on you like some locus  
I'm called upon so full of rage  
Now all I see is red  
Enemy time you wake up  
Mother fucker you're dead
