

Drop Down To Earth

Puressence

hey say what do I know? They say my heads in the clouds cos I dont like what I see down below

They say come back to earth and start getting real yeah I say come back to earth and start getting real, I know I cant

I go through time and space I see the moon and the stars and the teardrops streaming down your face

They say come back to earth and start getting real yeah Come back to earth and start getting real yeah Come back to earth and start getting real yeah Come back to earth and start getting real yeah

You you you you're the one I've waited for I just want things to be the same Oh, much better than before

They say come back to earth and start getting real yeah I say come back to earth and start getting real, I know I cant Don't wanna come back to earth and start getting real yeah Come back to earth and start getting real yeah Come back to earth and start getting real yeah Come back to earth and start getting real yeah

You you you you're the one I've waited for I say that you you you You You you you You you you You you you
