

# Raise Me To The Ground

Puressence

you raise me right to the ground  
and i cry just like the wind  
it ain't nobody's fault

but it's only hurt and there only words

and we float just like the river through this town  
with our Cantonese and our livers hanging out

and we both sit here together through the doubts

but it's only hurt and there only words

it's amazing just just now fire fall  
from the horse running next to a chain as battalions call

but it's only hurt and there only words

and we float just like the river through this town  
with our Cantonese and our livers hanging out

and we both sit here together through the doubts

but it's only hurt and there only words
