

In the light of what's become  
Daily incidents to some  
We've decided time is nigh for action  
Once the earth has lost its grip  
We had to opt for full blown leadership

Prepare for takeoff  
Into the unknown  
We're on our own...

Headed for outer space  
Saving the human race from dying  
At least we keep trying 'till we're gone

And as we leave our galaxy  
We will search for certainty  
Other worlds resembling ours  
Illuminating journey through the stars

Head on, star men  
Survival we seek  
Our greatest plan

Aiming at outer space  
Saving the human race from dying  
At least we keep trying to become citizens of the stars  
Earth will be but memoirs we treasure  
If we get there in time

No time to waste  
Resources are few  
For our big debut

Headed for outer space  
Saving the human race from dying  
At least we keep trying 'till we're gone

Citizens of the stars  
Earth will be but memoirs we treasure  
If we get there in time

And the search went on and on  
We feared we'd never see the sun  
Faced with few alternatives  
We turned around like resigned fugitives  
But then a flash - a big bang, the divine  
Disintegrated both space and time...
