

Little Sister

Queens of the Stone Age

Hey sister why you all alone?
I'm standing out your window
Hey little sister can I come inside there?

I want to show you all my love
I want to be the only one
I know you like nobody ever, baby

Little sister can't you find another way?
No more living life behind a shadow (2x)

You whisper secrets in my ear
Slowly dancing cheek to cheek
Such a sweet thing when you open up, baby

They say I'll only do you wrong
Come together cause I understand
Just who you really are yeah, baby

Little sister can't you find another way?
No more living life behind a shadow (2x)
