

# Not Enough

Quietdrive

Had to leave a little love on our high soon  
Had to leave a little love, leave a little love, leave a little love

She's the weather, she's changing every week  
She's driving me fucking insane  
And I'm the fire that's caught out in the rain  
And I'll figure out what I won't fade

If I could figure it out just to figure it out  
Just to figure it out cause I need you  
I'll just say what I want, yeah I'll just say what I want  
Yeah I'll just say what I want, yeah I want you bad

If I could make it on my own  
I'll fall in love again  
I would never be alone  
But if I want to stay  
I would try to bring you everything you say  
It's not enough, it's not enough  
It's not enough

And I'm fighting a war that I can't win  
I'll take the pain but don't walk away  
And I'm surviving, live to fight another day  
I'll figure it out, but I won't fade

If I could figure it out just to figure it out  
Just to figure it out cause I need to  
I'll just say what I want, yeah I'll just say what I want  
Yeah I'll just say what I want, cause I want you girl

If I could make it on my own  
I'll fall in love again  
I would never be alone  
But if I want to stay  
I would try to bring you everything you say  
It's not enough, it's not enough  
It's not enough

How long will you find me  
How long would you remind me

With all the lies and tears I've shed  
It's a mess, I confess but it's better than war  
It's not enough, it's not enough  
It's not enough, it's not enough, it's not enough

If I could make it on my own  
I'll fall in love again  
I would never be alone  
But if I would stay  
I would try to bring you everything you say  
It's not enough, it's not enough  
It's not enough  
If I could make it on my own  
I'll fall in love again  
I would never be alone

But if I would escape  
I would try to bring you everything you say  
It's not enough, it's not enough

Oh, we had a little bit of love but I had to let it go  
Had a little bit of touch but I had to go  
Breaking it up to pieces, just to make you see it's not enough  
It's not enough, it's not enough  
It's not enough
