## Starbright

Quietdrive

Come home to your place I've got a little while Till I've gotta leave You know there's been times Where I couldn't lie to your face But right now I'm looking at you Through the window of your soul I know those little dark holes are beautiful But I, I hear the words I should be saving I just wish that you could know I just think that you should know That your star is so bright I can see your core And you light up my life So I can see more I don't care if you're lost Or you're scared Or you never, ever Never, ever wanna be friends There's a small step outside your place I've got a little wine So I can taste all the bittersweet times That I have felt again But it's not too late to repair myself From the damage done Since I've been gone And I know I see the snow It starts to fall down I just think that I should go 'Cause your star is so bright I can see your core And you light up my life So I can see more I don't care if you're lost Or you're scared Or you never, ever Never, ever wanna be friends Please, please belong here Please, please belong here Please, please belong here Belong here You love me, you love me 'Cause your star is so bright I can see your core And you light up my life So I can see more I don't care if I get lost And I'll see you again (2x)
