

## Before It Burned

Quinn XCII

My heart falls on my chest, beats crazy when I'm around you  
Most times I'm sweating bullets soon as we're let outta school  
'Cause I don't wanna find you standing there with someone new  
I think I have to kill myself if somebody knew

The way that I feel when you say my name but don't shout it  
The sun's on your face, but everything else is too clouded

I go back and forth and now I'm wondering  
Why you're so caught up in his lust  
I stand outside with distance  
And I can tell, way deep down, that there's no trust  
I can't stand how it feels  
Knowing you'll never see me more than just  
A face in the crowd, a tape on the ground  
A flame that went out before it burned

I never tried, it's so one-sided, so I can't blame you  
There's no denying I caught your eye, then I looked at my shoes  
I pray so hard, need back those chances I always blew  
I think I have to kill myself if somebody knew

The way that I feel when you say my name but don't shout it  
The sun's on your face, but everything else is too clouded  
And all that I need is that simple sound from those lips  
'Cause you've been playing me over and over again  
Playing me over and over again

I go back and forth and now I'm wondering  
Why you're so caught up in his lust  
I stand outside with distance  
And I can tell, way deep down, that there's no trust  
I can't stand how it feels  
Knowing you'll never see me more than just  
A face in the crowd, a tape on the ground  
A flame that went out before it burned

I go back and forth and now I'm wondering  
Why you're so caught up in his lust  
I stand outside with distance  
And I can tell, way deep down, that there's no trust  
I can't stand how it feels  
Knowing you'll never see me more than just  
A face in the crowd, a tape on the ground  
A flame that went out before it burned
