

# Wake Up Everybody

R. Kelly

Making love till you scream, I wanna wake everybody  
When we're making children, wanna wake everybody  
And I mean every, every, every

Take your time, we got all night  
Trust in me I'm gonna get it right  
Whatever's on, take it off  
I wanna get inside with you baby and get lost

And the more I lay with you  
I'm not concerned about what neighbors gon' do  
And I don't care if they leave this room  
Cause we'll be...

Making love till you scream, I wanna wake everybody  
When we're making children, wanna wake everybody  
And I mean every, every, every

The way we touch, the way we kiss  
Oh girl I love it when it feels like this  
Just forget what you had to do  
Cause the night is all about me and you

And the more I lay with you  
I'm not concerned about what neighbors gon' do  
And I don't care if they leave this room  
Cause we'll be...

Making love till you scream, I wanna wake everybody  
When we're making children, wanna wake everybody  
And I mean every, every, every

So open the window baby  
I don't care if the world hears us baby  
Cause as long as you're here lying next to me  
Girl, we can lay on the floor  
Don't need any privacy

Making love till you scream, I wanna wake everybody  
When we're making children, wanna wake everybody  
Making love till you scream, I wanna wake everybody  
When we're making children, wanna wake everybody  
Making love till you scream, I wanna wake everybody  
When we're making children, wanna wake everybody
