We got a supermarket and a church For anyone who s got the urge There s a nightclub and a school Faith, a devil and a god But more important, there's a bar We s got neighbours with new cars Brand new cars

Here in my town, my little town
My little town, my town, this is my town
This is my town, my little town
My little town, my town, this is my town

So the city wasnOt what you thought itOd be Every night you woke up
In lost and found, you see
I saw you every night
And everybody is always in a hurry
Yeah they run, run, run
Oh man, thatOs just not me
I know you disagree
But I'll stay here in

My town, my little town
My little town, my town, this is my town
This is my town, my little town
My little town, my town, this is my town

But the city is always warm and pleasing
No stuck up folks, brand new diseases
Everywhere around
Get my kicks more than a lot
The more I get, the more I lose my appetite
And that's not right
ID11 stay in

My town, my little town
My little town, my town, this is my town
This is my town, my little town
My little town, my town, this is my town

We got a supermarket and a church For anyone who s got the urge There s a nightclub and a school out there Faith, a devil and a god But more important, there's a bar We s got neighbours with new cars Not that us folks would drive real far
