

## Heir of Darkness

Ragnarok

The infinity of blackness calms me  
I feed in its embrace  
It makes me strong  
Gives me powers beyond life  
I'm in a womb-son of darkness  
My throne be the womb  
As my unborn soul is eternal

Mother eat the light  
Raise me in forever black night.  
And so I swear  
Never to leave this dark  
My kingdom of hate

Emptiness between the stars  
Black nothing of eternal night  
Granter of unlife-mother of silenced souls  
Sator-Saturnus-Sathanas

I will never be born  
Forever embryo of blackness  
I inherit the hate  
That dissolves the light and blackens the stars  
In my kingdom of night  
Beginning of time never was and never will be  
For I was there  
And forever am.
