

## Planetary

Rainer Maria

The skyline is two gazes long.  
And i crane my neck  
To take it all in,  
The skyline is two gazes long.  
And i bump my head  
Against the windshield,  
(trying to find the sun.  
It runs ahead of us.  
I don't know what direction that is.)

I can see you craning your neck  
But momentum makes my head  
Ponderous and heavy.  
Planetary rotation  
Is time winding down?

The light from our bodies precedes us.  
I want to go to far away places.
