

# I See You

Raul Malo

Where was I when you forgot about me?  
Was I with you right there in the room?  
Did it happen overnight or a little at a time?  
Was it something I did or didn't do?

And now you're staring back at me  
Still you never see

That I see you never see me  
Never hear and never believe  
And every night I see you losing me

Why does love get so complicated?  
Why do feelings always have to change?  
Can't they last forever, do they fade away with time  
Or does it always have to end this way?

Tell me why, if love is really blind  
When I close my eyes

Do I see you never see me  
Never hear and never believe  
And every night I see you losing me

Yeah, I see you never see me  
Never hear and never believe  
And every night I see you losing me

I see you you, I see you, babe  
Never hear and never believe it  
Every night I see you losing me  
That's what you do to me

I see you, I see you, I see you, I see you  
Never here and never, never, never  
Every night I see you losing me  
That's what you do to me

I see you  
Never hear and  
Every night I see you losing me  
Never, never, never, never, never

I see you, I see you  
Never hear and  
Every night I see you losing me
