

# Life Is Beautiful

Raven-Symoné

I get so tired  
Of the world passing by us  
Makes me want to jump out of my skin  
What are we doing in this race we call human  
If we're too afraid of jumping it  
Shake it shake it shake it up  
No need to save your sacred stuff  
Take it take it take it slow  
But take it anywhere you want to go

Why do you make it so complicated  
Life is beautiful, baby  
Shut up and appreciate it  
Life is beautiful, baby

Take a chance make some noise  
Cause the world is your oyster  
Don't you want to come out of your shell  
We can dance on some chairs with some cute millionaires  
Or on the tables of your local taco bell  
Shake it shake it shake it up  
No need to save your sacred stuff  
Take it take it take it slow  
But take it anywhere you want to go

It's a modern epidemic  
How some people never get it  
How you only get one shot  
The world keeps turning and your either on or off it
