

# Faster Than The Speed Of Light

Raven

Race with the devil - on your marks, get set, go  
Hell bent on getting to where I don't know  
Leaving our sector, into the unknown  
Now more than ever we are alone

Faster - Give it all you got  
Faster - We can never stop  
Faster than the speed of light

Blue shifted galaxies squeeze into view  
A circular rainbow that we can smash through  
Pushing to the limit, the overdrive screams  
Taking us further than our wildest dreams

Over the limit, cacophony reigns  
Crushed into oblivion, nothing remains  
Just a hole in the fabric of space and time  
Swallowing all of our screams
