## **Talk To Your Heart**

## **Ray Price**

When your alone at night with the world locked outside Have a talk to your heart about me
If your's told that it's right that we stay apart
Then let me come in and talk to your heart

Lovin' you changed my life in just one day I'm waiting to hear what your heart will say If your told that it's right that we stay apart Then let me come in and talk to your heart

Believe you me there will be happiness when You open your door and let me come in If your told that it's right that we stay apart Then let me come in and talk to your heart

So talk to your heart if it can't decide Remember my own is waiting outside Waiting alone outside in the dark So let me come in and talk to your heart
