

# You've Got the Music Inside

Ray Stevens

I'm almost afraid to believe  
That my long and lonely search is finally over  
For while so many pretty faces to see  
Somehow your love is a genuine disclosure

And though I hesitate to trust the way I feel  
The vibrations that I get from you have got to be real

And I know you've got the music inside  
That warm, elusive music down inside  
I can tell you hear it play  
It's in every word you say  
And it shines through the love light in your eye

Yes, I know you've found the music inside  
So open up and let your heart confide  
Let it out, let me in, and let our song begin  
'Cause I know you got the music  
Let me show you how to use it  
Baby, you've got the music down inside

We reached an understanding, I know  
For as our eyes met, you seduced me so sweetly  
So let the mutual telepathy flow  
And surrender to the magic completely

'Cause it never felt so right 'til I met you  
And I never thought someone could make me feel like you do

And I know you've got the music inside  
That warm, elusive music down inside  
I can tell you hear it play  
It's in every word you say  
And it shines through the love light in your eye

Yes, I know you've found the music inside  
So open up and let your heart confide  
Let it out, let me in, and let our song begin  
'Cause I know you got the music  
Let me show you how to use it  
Baby, you've got the music down inside

Whoa, yeah  
I know you got the music  
Let me show you how to use it now  
Whoa, yeah  
Baby, you've got it  
Whoa, you know that you got it, yeah  
I want you  
Oh
