

Abandoned youth, aborted bastard children of this world  
Wandering the streets, sleeping on the cold concrete  
Eating from the dumpsters, feeding off discarded scrap  
Disposed by misfortune, society, and the wealthy  
Suffering from hunger, dying, riddled with disease  
Complacent conformist turn eyes blindly

Everyday they are taking away our liberty  
Throughout history, forcing us into slavery  
These are reasons why I question all authority  
Victim of this system designed for failure  
Lied to by the president, betrayed by the government  
Banned by the establishment, now its time to show dissent  
Poverty is prevalent. Violence is evident  
Feudal is the fight from law enforcement

We, the people, we're proven powerless  
You do not decide the direction of your children's fate  
Crooked corporations corrupted by money and greed  
Deplete the resources with nothing left to fend for ourselves  
Revolution, rebelling against this system that's flawed  
Inciting riots, uprising beyond their boundaries  
Hold them hostage, resistance with no negotiations  
Do not be afraid to engage in overthrowing the opposition

Now it's too late...  
For a divided nation dangling by threads  
There are too many with nothing left to lose  
Desperate times bring drastic measures  
The blind obedient, subservient to government  
Now find allegiance far from freedom's stand  
Land of the greed, home of the slaves  
Is there no hope for the imminent future?  
No...

Crowded nations  
Planet facing overpopulation  
Raping, taking landscapes whole  
Pollution fills her dying skies

Global warming  
Damage irreversible  
Final warning, planet uninhabitable  
Environmental destruction of earth

Knowledge verses  
Unconscientious ignorance  
Massive armies amassing under arrogance  
Consequences our children will face

Feudal fighting War will never bring us peace  
Circle, violence, cycle that will never cease  
Eye for an eye and blood for blood  
Blood for blood!
