

# Idiopathic Pandemic Spreading

Reciprocal

Outbreak of disease  
Idiopathic pandemic is spreading  
Escaping the quarantine  
Now reaching global proportions  
All the hospitals are filled  
Reporting cases of infection  
What they are trying to control  
Mankind cannot contain

Slowly decay, diagnosis terminal  
Incurable, there is no immunity  
Humanity forced to suffer under plague  
Idiopathic epidemic is spreading

Uncontrolled condition of deterioration within  
Victims feel weakness before digression of functions begins  
Symptoms of nausea, profusely vomiting your insides out  
Respiratory failure from coughing until your lungs collapse  
Spasms, seizures, and neurological convulsions contort  
Clotting, rotting, feeling tissue and fibers starting to tear  
Intestinal blockage, stomach will no longer emulsify  
Health organizations warning all to prepare to die...

Mass hysteric, public panic, illness fatal  
Idiopathic pandemic contagious to all  
Cannot escape an influenza fate that awaits  
Pathogenic airborne virus depopulates

Littering the city streets  
See cadavers decomposing  
Biohazardous remains  
To be handled with precaution  
The priests read the rites  
Mortuaries burn the bodies  
Laboratories try to hide  
Experiments and government lies

Six billion dead, sickness overwhelming man  
There is no cure, death toll immeasurable  
Humanity forced to suffer under plague  
Idiopathic epidemic is spreading

Exterminate, helpless  
Human race, hopeless  
Rioting, looting  
Remainents, ruin  
Struggle to survive  
No one left alive  
Idiopathic pandemic spreading
