

Under Lucky Stars

Reckless Kelly

Together on a lucid night
Starin' at empyrean skies of wonder
Don't be afraid to let it pass you by
All that matters is you and I and each other

We were born under stars
We were born under stars

Watch your memories drift away
Look ahead to another day and discover
What you feel is here right now
Every moment conceives somehow from another

We were born under stars
We were born under stars

Hold me close and breathe with me
Precious as a dream could be, I feel you
Under the watch of Orion
Safe until the morning comes to steal you

We were born under stars
We were born under stars
We were born under stars
We were born under stars
