

Take You Out

Reed Deming

I hope that I don't interrupt but I had to say hi
I think that you're magnificent like magic to my eyes
And you circle me like a tornado in my mind that I can't fight,
I can't run, and I can't hide
I'd love to take you for a cruise around the city lights
But maybe just a dinner and a movie that you'd like
Or anything that lets me spend a little bit more time right by
your side anywhere I don't mind, I don't mind

So if you're down let's leave this town and go
Maybe I could be the one
Maybe we could fall in love
Or maybe I'll be everything you've needed all your life
Maybe we could take a chance
You know that I could make it right
And I would do anything, to take you out tonight
To take you out tonight (To take you out tonight)

The guy you're talking to right now is not the guy you need
I could paint you portraits and I'd write you symphonies
And he could maybe take you out but I could bring the world rig
ht to your door
Need I, say more

So if you're down let's leave this town and go
Maybe I could be the one
Maybe we could fall in love
Or maybe I'll be everything you've needed all your life
Maybe we could take a chance
You know that I could make it right
And I would do anything,
To take you out tonight
To take you out tonight (To take you out tonight)

Maybe I could be the one
And maybe we could fall in love
And maybe I'll be everything you've needed all your life
And maybe we could take a chance
You know that I could make it right
And I would do anything,
To take you out tonight
[x2]

To take you out tonight
To take you out tonight
