

# Take You With Me

Reed Deming

Baby I was born to fly  
Let me off the ground and I'll take you with me

Smile on your face but I can see the fear in you  
Twenty thousand feet high, jumping without a parachute  
Your heart is in the clouds, you can't see the ground  
I know I would be scared too  
But have a little faith, I promise you'll be safe  
'Cause baby I'm jumping with you

I would never let you fall without me catching you  
Baby we can take this life and make it something new  
I know you're afraid to be loved (Flying too close to the sun)  
Last thing I wanna do is break you and run  
I won't break you and run  
So let me off the ground and I'll take you with me

(Take you with me)  
(Take you with me)  
(Take you with me)  
(Take you with me)

Life is a canvas, you paint it the way that you choose  
I carry the weight of the past that I wanna undo  
If you take my hand you might understand  
I'll share all my stories with you  
'Cause November rain and February pain  
Led me straight to June

I would never let you fall without me catching you  
Baby we can take this life and make it something new  
I know you're afraid to be loved (Flying too close to the sun)  
Last thing I wanna do is break you and run  
I won't break you and run  
So let me off the ground and I'll take you with me

(Take you with me)  
(Take you with me)  
(Take you with me)

I would never let you fall without me catching you  
Baby we can take this life and make it something new
