All day I sit till dawn just thinkin' about your smile I see yo u in my dreams how you complete me the flowers you left me here still wilt on the shelf by the phone you took a part of me all the tears I've cried for you I'ts day by day for me the only w ay I get by I keep talking in my sleep as if you will stay right by my side baby...

CHORUS:

How could you leave, and leave here with me all of the precious , memories just left me behind and how my heart cries without y ou I'm so lost baby I still can't believe that you could just l eave standing alone the misery just left me behind to find this ... come back baby

I pray I call your name still wishing that you would come home. ..

Nothing comforts me... but if you could hold me...

My world would start to turn for a moment that things would be right

Can you hear me?

Baby don't you need me too?

Are you afraid of me? Please tell me how love passed us by... Right now I'll do anything just to have you right back in my li fe...

Baby...

Repeat chorus

All of the pain and the hurt trapped inside, keeps pulling me d own and God knows how I try...

So hard when you love someone, the way that I love you... Please come back...

We can talk it out loud the time and space my love away from yo $\mathbf{u}\dots$

It's day by day for me the only way I get by...

I keep talking in my sleep as if you were still right by my sid e...

Baby...
