

Star shine forever
Will shine in my heart
I know I'll always be free

Far away from heaven
Where the sun can't reach the day
That is where I'm tortured as
I'm crawling around in chains
Every day is a misery
When I'm told just what to do
With no one to appreciate
The work I do for you

"Every night I hear you crying out
There's something
You should know - You're not alone
my friend"

Sometimes I wonder if
Nightmares come true
I believe that one day
I will see a happy ending

Star shine forever
Will shine in my heart
I know I'll always be free
(When I know I...)
Had every moment of anger relieved
I can create my paradise

"Yes I know you're longing for that night but they won't let you go
We will help you make your dreams come true this night
Never hesitate!"

Every night of loneliness
Could be a whole eternity
When you're alone, like me

"Sometimes you reach for the top and you fall"

No! no, this can't end this way
