## **Make It Bright**

## **Remedy Drive**

Lights out the waves are breaking Right now my trust is shaken I try to hold on tight But there's not much hope in sight

You came through
Lights turned on inside of me
The things You do
Right the wrongs inside of me
On my side every time
Be the fire igniting me
Light a spark in the dark
And make it bright in me

When darkness is upon us
I'm standing on a promise
When I don't see anything
I wait for the rescue that You bring
That You bring

You came through
Lights turned on inside of me
The things You do
Right the wrongs inside of me
On my side every time
Be the fire igniting me
Light a spark in the dark
And make it bright in me

I'm waiting on Your light When I can barely see I'm waiting on Your light To make it bright in me

You came through
Lights turned on inside of me
The things You do
Right the wrongs inside of me
On my side every time
Be the fire igniting me
Light a spark in the dark
And make it bright in me
